Hi Mary,

The QFR responses to question 5 have been revised to point to the correct columns and tabs in the attached. The latest version of attachment 1 is attached. As we just chatted about briefly, we still need input from the divisions to finalize these.

Hans

Hi. Just checking back on whether Attachment 1 needs any revisions based on the TRI spreadsheet revisions/feedback?  
Thanks

Hans,

Thank you for the revised TRI spreadsheet. This is under review in the IO and a commitment was made in the Leadership meeting to get this to OCIR and to the hill today. A question came up regarding whether there are any revisions also needed to Attachment 1 to the PFAS QFR package. I have also attached it here. Alex and Charlotte are reviewing the PFAS QFR package today and we also need to get it to OCIR today so your feedback on Attachment 1 asap would be appreciated. I have added Tala so that she understands which spreadsheets were being discussed in the Leadership meeting.

M
